CHEMICO-BIOLOGICAL INTERACTIONS

SUBJECT INDEX

VOLUME 81 (1992)

12-*O*-tetradecanoylphorbol 13-acetate, pristane, chloramphenicol acetyltransferase, transfection, *trans*-activation, 119

7*H*-dibenzo[*c*,*g*]carbazole, metabolism, dibenz[*a*, *j*]acridine, rat microsomes, mouse microsomes, 131

Acrolein, liver toxicity, iron, vitamin E, allyl alcohol, reductive stress, 57

Acronycine, 2-nitroacronycine, acronycine azine, cytotoxicity, nucleic acid synthesis, cell cycle effect, mechanism of action, 35

Acronycine azine, acronycine, 2-nitroacronycine, cytotoxicity, nucleic acid synthesis, cell cycle effect, mechanism of action, 35

Alkenals, autoxidation, membrane perturbation, mercapto group, *p*-hydroxymercuribenzoate, 209

Allyl alcohol, liver toxicity, iron, vitamin E, acrolein, reductive stress, 57

3-Amino-1-hydroxypropylidene-1,1-bisphosphonate, APD, pamidronate, plasma protein binding, transferrin, calcium, iron, 79

APD, pamidronate, 3-amino-1-hydroxypropylidene-1,1-bisphosphonate, plasma protein binding, transferrin, calcium, iron, 79

Aromatic amines, hemoglobin adducts, quantitative structure activity relationships, molecular orbital calculations, biomonitoring, 91

Autoxidation, alkenals, membrane perturbation, mercapto group, *p*-hydroxymercuribenzoate, 209

Biomonitoring, hemoglobin adducts, aromatic amines, quantitative structure activity relationships, molecular orbital calculations, 91

Blue-green algae, microcystin, hepatocytes, toxicity, phosphorylation, cytoskeleton, intermediate filaments, 181

Calcium, APD, pamidronate, 3-amino-1-hydroxypropylidene-1,1-bisphosphonate, plasma protein binding, transferrin, iron, 79

Carbon disulfide, pyrazole-inducible *P*-450$_{IIE1}$, diethyldithiocarbamate, disulfiram, inactivation of *P*-450$_{IIE1}$, 271

Carcinogenicity, structure-activity relationship, polycyclic aromatic compounds, skin cancer, 149

Cell cycle effect, acronycine, 2-nitroacronycine, acronycine azine, cytotoxicity, nucleic acid synthesis, mechanism of action, 35

Chemical speciation, mercury-NMR, mercury chloride, model membranes, mercury complexes, equilibrium constants, 243

Chick embryos, polychlorinated biphenyls, polycyclic aromatic hydrocarbons, embryolethality, ethoxyresorufin *O*-deethylase induction, 69

Chloramphenicol acetyltransferase, pristane, 12-*O*-tetradecanoylphorbol 13-acetate, transfection, *trans*-activation, 119

Cigarette smoke, hydrogen peroxide, hydroquinone, hydroxyl radicals, endonuclease activation, 8-hydroxydeoxyguanosine, 197

Cytoskeleton, blue-green algae, microcystin, hepatocytes, toxicity, phosphorylation, intermediate filaments, 181

Cytotoxicity, acronycine, 2-nitroacronycine, acronycine azine, nucleic acid synthesis, cell cycle effect, mechanism of action, 35

Dibenz[*a*, *j*]acridine, metabolism, 7*H*-dibenzo[*c*,*g*]carbazole, rat microsomes, mouse microsomes, 131

Diethyldithiocarbamate, pyrazole-inducible *P*-450$_{IIE1}$, disulfiram, carbon disulfide, inactivation of *P*-450$_{IIE1}$, 271

Disulfiram, pyrazole-inducible *P*-450$_{IIE1}$, diethyldithiocarbamate, carbon disulfide, inactivation of *P*-450$_{IIE1}$, 271

DNA repair, platinum, drug resistance, murine leukemia, L1210, human ovarian A2780, 223

Drug resistance, platinum, DNA repair, murine leukemia, L1210, human ovarian A2780, 223

Ehrlich ascites tumor cells, spermidine/spermidine N^1-acetyltransferase, lithium chloride, protein kinase C, 233
Embryolethality, chick embryos, polychlorinated biphenyls, polycyclic aromatic hydrocarbons, ethoxyresorufin *O*-deethylase induction, 69
Endonuclease activation, cigarette smoke, hydrogen peroxide, hydroquinone, hydroxyl radicals, 8-hydroxydeoxyguanosine, 197
Equilibrium constants, mercury-NMR, mercury chloride, model membranes, mercury complexes, chemical speciation, 243
Ethoxyresorufin *O*-deethylase induction, chick embryos, polychlorinated biphenyls, polycyclic aromatic hydrocarbons, embryolethality, 69

Glutathione peroxidase, selenoproteins, hydrogen peroxide, peroxisome proliferation, 291

Hemoglobin adducts, aromatic amines, quantitative structure activity relationships, molecular orbital calculations, biomonitoring, 91
Hepatocytes, blue-green algae, microcystin, toxicity, phosphorylation, cytoskeleton, intermediate filaments, 181
Human ovarian A2780, platinum, drug resistance, DNA repair, murine leukemia, L1210, 223
Hydrogen peroxide, cigarette smoke, hydroquinone, hydroxyl radicals, endonuclease activation, 8-hydroxydeoxyguanosine, 197
Hydrogen peroxide, selenoproteins, glutathione peroxidase, peroxisome proliferation, 291
Hydroquinone, cigarette smoke, hydrogen peroxide, hydroxyl radicals, endonuclease activation, 8-hydroxydeoxyguanosine, 197
8-Hydroxydeoxyguanosine, cigarette smoke, hydrogen peroxide, hydroquinone, hydroxyl radicals, endonuclease activation, 197
Hydroxyl radicals, cigarette smoke, hydrogen peroxide, hydroquinone, endonuclease activation, 8-hydroxydeoxyguanosine, 197
p-Hydroxymercuribenzoate, alkenals, autoxidation, membrane perturbation, mercapto group, 209

Inactivation of *P*-450_{IIE1}, pyrazole-inducible *P*-450_{IIE1}, diethyldithiocarbamate, disulfiram, carbon disulfide, 271
Intermediate filaments, blue-green algae, microcystin, hepatocytes, toxicity, phosphorylation, cytoskeleton, 181
Iron, APD, pamidronate, 3-amino-1-hydroxypropylidene-1,1-bisphosphonate, plasma protein binding, transferrin, calcium, 79
Iron, liver toxicity, vitamin E, allyl alcohol, acrolein, reductive stress, 57

L1210, platinum, drug resistance, DNA repair, murine leukemia, human ovarian A2780, 223
Lithium chloride, spermidine/spermidine N^1-acetyltransferase, protein kinase C, Ehrlich ascites tumor cells, 233
Liver toxicity, iron, vitamin E, allyl alcohol, acrolein, reductive stress, 57

Mechanism of action, acronycine, 2-nitroacronycine, acronycine azine, cytotoxicity, nucleic acid synthesis, cell cycle effect, 35
Membrane perturbation, alkenals, autoxidation, mercapto group, *p*-hydroxymercuribenzoate, 209
Mercapto group, alkenals, autoxidation, membrane perturbation, *p*-hydroxymercuribenzoate, 209
Mercury-NMR, mercury chloride, model membranes, mercury complexes, equilibrium constants, chemical speciation, 243
Mercury chloride, mercury-NMR, model membranes, mercury complexes, equilibrium constants, chemical speciation, 243
Mercury complexes, mercury-NMR, mercury chloride, model membranes, equilibrium constants, chemical speciation, 243
Metabolism, dibenz[*a*,*j*]acridine, 7*H*-dibenzo[*c*,*g*]carbazole, rat microsomes, mouse microsomes, 131
Microcystin, blue-green algae, hepatocytes, toxicity, phosphorylation, cytoskeleton, intermediate filaments, 181
Model membranes, mercury-NMR, mercury chloride, mercury complexes, equilibrium constants, chemical speciation, 243
Molecular orbital, mutagen, nitrenium ion, structure-activity relationship, 19
Molecular orbital, mutagen, nitrenium ion, structure-activity relationship, 1
Molecular orbital calculations, hemoglobin adducts, aromatic amines, quantitative structure activity relationships, biomonitoring, 91
Mouse microsomes, metabolism, dibenz[*a*,*j*]acridine, 7*H*-dibenzo[*c*,*g*]carbazole, rat microsomes, 131

Murine leukemia, platinum, drug resistance, DNA repair, L1210, human ovarian A2780, 223
Mutagen, nitrenium ion, molecular orbital, structure-activity relationship, 19
Mutagen, nitrenium ion, molecular orbital, structure-activity relationship, 1

Nitrenium ion, mutagen, molecular orbital, structure-activity relationship, 19
Nitrenium ion, mutagen, molecular orbital, structure-activity relationship, 1
2-nitroacronycine, acronycine, acronycine azine, cytotoxicity, nucleic acid synthesis, cell cycle effect, mechanism of action, 35
Nucleic acid synthesis, acronycine, 2-nitroacronycine, acronycine azine, cytotoxicity, cell cycle effect, mechanism of action, 35

Pamidronate, APD, 3-amino-1-hydroxypropylidene-1,1-bisphosphonate, plasma protein binding, transferrin, calcium, iron, 79
Peroxisome proliferation, selenoproteins, glutathione peroxidase, hydrogen peroxide, 291
Phosphorylation, blue-green algae, microcystin, hepatocytes, toxicity, cytoskeleton, intermediate filaments, 181
Plasma protein binding, APD, pamidronate, 3-amino-1-hydroxypropylidene-1,1-bisphosphonate, transferrin, calcium, iron, 79
Platinum, drug resistance, DNA repair, murine leukemia, L1210, human ovarian A2780, 223
Polychlorinated biphenyls, chick embryos, polycyclic aromatic hydrocarbons, embryolethality, ethoxyresorufin *O*-deethylase induction, 69
Polycyclic aromatic compounds, structure-activity relationship, carcinogenicity, skin cancer, 149
Polycyclic aromatic hydrocarbons, chick embryos, polychlorinated biphenyls, embryolethality, ethoxyresorufin *O*-deethylase induction, 69
Pristane, 12-*O*-tetradecanoylphorbol 13-acetate, chloramphenicol acetyltransferase, transfection, *trans*-activation, 119
Protein kinase C, spermidine/spermidine N^1-acetyltransferase, lithium chloride, Ehrlich ascites tumor cells, 233
Pyrazole-inducible *P*-450_{IIE1}, diethyldithiocarbamate, disulfiram, carbon disulfide, inactivation of *P*-450_{IIE1}, 271

Quantitative structure activity relationships, hemoglobin adducts, aromatic amines, molecular orbital calculations, biomonitoring, 91

Rat microsomes, metabolism, dibenz[*a*,*j*]-acridine, 7*H*-dibenzo[*c*,*g*]carbazole, mouse microsomes, 131
Reductive stress, liver toxicity, iron, vitamin E, allyl alcohol, acrolein, 57

Selenoproteins, glutathione peroxidase, hydrogen peroxide, peroxisome proliferation, 291
Skin cancer, structure-activity relationship, carcinogenicity, polycyclic aromatic compounds, 149
Spermidine/spermidine N^1-acetyltransferase, lithium chloride, protein kinase C, Ehrlich ascites tumor cells, 233
Structure-activity relationship, carcinogenicity, polycyclic aromatic compounds, skin cancer, 149
Structure-activity relationship, mutagen, nitrenium ion, molecular orbital, 19
Structure-activity relationship, mutagen, nitrenium ion, molecular orbital, 1

Toxicity, blue-green algae, microcystin, hepatocytes, phosphorylation, cytoskeleton, intermediate filaments, 181
trans-activation, pristane, 12-*O*-tetradecanoylphorbol 13-acetate, chloramphenicol acetyltransferase, transfection, 119
Transfection, pristane, 12-*O*-tetradecanoylphorbol 13-acetate, chloramphenicol acetyltransferase, *trans*-activation, 119
Transferrin, APD, pamidronate, 3-amino-1-hydroxypropylidene-1,1-bisphosphonate, plasma protein binding, calcium, iron, 79

Vitamin E, liver toxicity, iron, allyl alcohol, acrolein, reductive stress, 57
